SUMMARY

Senior Engineer with 15+ years of experience in enterprise infrastructure, Oracle/PostgreSQL database administration, cloud engineering, DevOps automation and production operations..Experienced in **AWS EC2, VPC, IAM, S3, EBS, ELB, RDS, DMS, EKS and CloudWatch**, infrastructure automation using **Terraform and Ansible**, and CI/CD implementation using **Jenkins, GitHub, CodeBuild and CodePipeline**. Strong experience in containerized application deployment using **Docker and Kubernetes**, including EKS cluster administration, IAM integration, RBAC, networking and monitoring with **Prometheus and Grafana**.Brings deep database engineering expertise in **Oracle RAC, Data Guard, RMAN, Exadata and PostgreSQL**, including database performance tuning, backup/recovery, HA/DR, cloud migration and **migration**.

Technical SKILLS

Cloud: AWS, OCI, Azure

AWS: EC2, VPC, IAM, S3, EBS, ELB/ALB, RDS, DMS, EKS, CloudWatch, Route 53, KMS

DevOps: Jenkins, GitHub, CodeBuild, CodePipeline, Docker, ECR, DockerHub

Containers: Docker, Kubernetes, EKS, Helm

IaC: Terraform, Ansible

Monitoring: CloudWatch, Prometheus, Grafana

Operating Systems: Linux, RHEL, Ubuntu

Databases: Oracle 19c/12c/11g, PostgreSQL 14/15/16, RAC, Data Guard

Migration: AWS DMS, Oracle-to-PostgreSQL, RMAN, pg_dump/pg_restore

Scripting: Bash, Shell, Python, SQL

Security: IAM, KMS, Security Groups, NACL, SSL/TLS, Secrets Management

Version Control: Git, GitHub Management

EXPERIENCE

IT Lead

06/2022 – 02/2026

AON Consulting

- Design, deploy, configure and maintain highly available, scalable and secure cloud infrastructure across AWS, OCI and Azure environments.
- Provision and manage AWS resources including EC2, VPC, IAM, S3, EBS, ELB/ALB, RDS, DMS, EKS, Route 53 and CloudWatch.
- Develop and maintain Infrastructure as Code using Terraform, including VPC, IAM, EC2, EKS and supporting cloud infrastructure.
- Implement CI/CD pipelines using Jenkins, GitHub, AWS CodeBuild and CodePipeline for automated application build, testing and deployment.
- Build, manage and deploy containerized applications using Docker and Kubernetes/Amazon EKS.
- Configure Kubernetes Deployments, Services, ConfigMaps, Secrets, Ingress, RBAC, namespaces and resource management.
- Implement cloud security using IAM roles and policies, Security Groups, NACLs, KMS, encryption, secrets management and least-privilege access.
- Configure and troubleshoot cloud networking including VPC, public/private subnets, route tables, Internet/NAT Gateways, Load Balancers, DNS and connectivity.
- Implement monitoring and observability using AWS CloudWatch, Prometheus and Grafana for infrastructure, application and Kubernetes environments.
- Automate operational activities using Bash/Shell scripting, Python, AWS CLI, Terraform and Ansible.
- Perform cloud migration and modernization activities, including Oracle database migration, AWS DMS, Oracle-to-PostgreSQL migration and application migration to AWS.

- Implement backup, disaster recovery and business continuity solutions aligned with RPO/RTO requirements.
- Troubleshoot production issues involving EC2, IAM, EKS, Kubernetes, networking, Load Balancers, storage, databases and CI/CD pipelines.
- Analyze CPU, memory, storage, network and application performance and implement appropriate optimization measures.
- Perform security, patching, vulnerability remediation and configuration hardening across cloud and Linux environments.

Technical Lead

07/2021 – 06/2022

Alten Calsoft Pvt. Ltd.

- Collaborate with application, database, security and infrastructure teams to design and implement cloud solutions.
- Create technical documentation, architecture diagrams, operational runbooks and disaster recovery procedures.
- Participate in production support, incident management, problem management and Root Cause Analysis (RCA).
- Drive automation and operational improvements to reduce manual effort, deployment time and infrastructure-related incidents.
- Ensure cloud environments follow organizational standards for security, availability, scalability, performance and cost optimization.
- Performed Oracle database creation, configuration, upgrades, patching, and maintenance.
- Collaborated with team to execute quarterly patching and fulfill service requests, ensuring compliance and security.

Database Administrator

10/2020 – 05/2021

Co-ordinate infotech Pvt. Ltd .

- Installation, configuration, and administration of Oracle database environments.
- Design and maintain highly available database environments using Oracle RAC, Data Guard, PostgreSQL Streaming Replication and cloud-based database services.
- Performed performance tuning using AWR, ADDM EXPLAIN PLAN and other oracle monitoring views.
- Tuned SQL queries, indexes, memory parameters, connection settings, and parameters.
- Performed performance tuning and optimization of Oracle databases, improving query response times and overall system efficiency
- Expertly managed and maintained Oracle Real Application Clusters (RAC) environments, ensuring high availability and scalability for critical applications.
- Implemented and maintained comprehensive database security frameworks, including user, role, and privilege management.
- Configured and administered Oracle Data Guard, successfully executing switchovers and failovers to validate disaster recovery plans.
- Conducted thorough monitoring of production Oracle alert logs, swiftly diagnosing and resolving database errors.

Team Leader

01/2018 – 10/2020

3i infotech Ltd.

- Managed and optimized Oracle databases exceeding 100 TB in size, ensuring efficient storage utilization and performance.
- Administered Oracle RAC environments, ensuring high availability and seamless operation for mission-critical systems.
- Implemented and enforced robust database security protocols, including user, role, and privilege management.
- Configured and managed Oracle Data Guard, ensuring business continuity through effective disaster recovery solutions.
- Optimized tablespace usage, reclaiming free space and reorganizing tables and indexes to enhance performance.
- Monitored production Oracle alert logs, proactively identifying and resolving database errors.
- Provided 24x7 production support, on-call rotation, and day-to-day operational assistance.

Team leader Acliv Technologies	03/2017 – 12/2017
Team leader Sanjari Corporates	09/2016 – 02/2017
Developer Jain Hydraulics	08/2013 – 08/2016
Assistant Service Manage AlbionInfoTel Pvt. Ltd.	09/2011 – 07/2013
